Paper 2 Data Response

**October/November 2023**

MARK SCHEME

Maximum Mark: 60

---

**Published**

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the October/November 2023 series for most Cambridge IGCSE, Cambridge International A and AS Level components, and some Cambridge O Level components.

**PUBLISHED****Generic Marking Principles**

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

**GENERIC MARKING PRINCIPLE 1:**

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

**GENERIC MARKING PRINCIPLE 2:**

Marks awarded are always **whole marks** (not half marks, or other fractions).

**GENERIC MARKING PRINCIPLE 3:**

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

**GENERIC MARKING PRINCIPLE 4:**

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

**GENERIC MARKING PRINCIPLE 5:**

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

**GENERIC MARKING PRINCIPLE 6:**

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

**PUBLISHED****Social Science-Specific Marking Principles  
(for point-based marking)****1 Components using point-based marking:**

- Point marking is often used to reward knowledge, understanding and application of skills. We give credit where the candidate's answer shows relevant knowledge, understanding and application of skills in answering the question. We do not give credit where the answer shows confusion.

From this it follows that we:

- a** DO credit answers which are worded differently from the mark scheme if they clearly convey the same meaning (unless the mark scheme requires a specific term)
- b** DO credit alternative answers/examples which are not written in the mark scheme if they are correct
- c** DO credit answers where candidates give more than one correct answer in one prompt/numbered/scaffolded space where extended writing is required rather than list-type answers. For example, questions that require  $n$  reasons (e.g. State two reasons ...).
- d** DO NOT credit answers simply for using a 'key term' unless that is all that is required. (Check for evidence it is understood and not used wrongly.)
- e** DO NOT credit answers which are obviously self-contradicting or trying to cover all possibilities
- f** DO NOT give further credit for what is effectively repetition of a correct point already credited unless the language itself is being tested. This applies equally to 'mirror statements' (i.e. polluted/not polluted).
- g** DO NOT require spellings to be correct, unless this is part of the test. However spellings of syllabus terms must allow for clear and unambiguous separation from other syllabus terms with which they may be confused (e.g. Corrasion/Corrosion)

**2 Presentation of mark scheme:**

- Slashes (/) or the word 'or' separate alternative ways of making the same point.
- Semi colons (;) bullet points (•) or figures in brackets (1) separate different points.
- Content in the answer column in brackets is for examiner information/context to clarify the marking but is not required to earn the mark (except Accounting syllabuses where they indicate negative numbers).

**PUBLISHED****3 Calculation questions:**

- The mark scheme will show the steps in the most likely correct method(s), the mark for each step, the correct answer(s) and the mark for each answer
- If working/explanation is considered essential for full credit, this will be indicated in the question paper and in the mark scheme. In all other instances, the correct answer to a calculation should be given full credit, even if no supporting working is shown.
- Where the candidate uses a valid method which is not covered by the mark scheme, award equivalent marks for reaching equivalent stages.
- Where an answer makes use of a candidate's own incorrect figure from previous working, the 'own figure rule' applies: full marks will be given if a correct and complete method is used. Further guidance will be included in the mark scheme where necessary and any exceptions to this general principle will be noted.

**4 Annotation:**

- For point marking, ticks can be used to indicate correct answers and crosses can be used to indicate wrong answers. There is no direct relationship between ticks and marks. Ticks have no defined meaning for levels of response marking.
- For levels of response marking, the level awarded should be annotated on the script.
- Other annotations will be used by examiners as agreed during standardisation, and the meaning will be understood by all examiners who marked that paper.

**Guidance on using levels-based marking**

Marking of work should be positive, rewarding achievement where possible, but clearly differentiating across the whole range of marks, where appropriate.

The examiner should look at the work and then make a judgement about which level statement is the best fit. In practice, work does not always match one level statement precisely so a judgement may need to be made between two or more level statements.

Once a best-fit level statement has been identified, use the following guidance to decide on a specific mark:

- If the candidate's work **convincingly** meets the level statement, award the highest mark.
- If the candidate's work **adequately** meets the level statement, award the most appropriate mark in the middle of the range.
- If the candidate's work **just** meets the level statement, award the lowest mark.
- L1, L2, etc. must be clearly annotated on the response at the point where the level is achieved.

**Assessment objectives****AO1 Knowledge and understanding**

Demonstrate knowledge and understanding of business concepts, terms and theories.

**AO2 Application**

Apply knowledge and understanding of business concepts, terms and theories to problems and issues in a variety of familiar and unfamiliar business situations and contexts.

**AO3 Analysis**

Analyse business problems, issues and situations by:

- using appropriate methods and techniques to make sense of qualitative and quantitative business information
- searching for causes, impact and consequences
- distinguishing between factual evidence and opinion or value judgement
- drawing valid inferences and making valid generalisations.

**AO4 Evaluation**

Evaluate evidence in order to make reasoned judgements, present substantiated conclusions and, where appropriate, make recommendations for action and implementation.

**PUBLISHED****Annotations**

<b><u>To award</u></b>	<b><u>Proposed annotation</u></b>	<b><u>Comment</u></b>
Correct	✓	For objective points that are right or wrong.
Incorrect	✗	For objective points that are wrong.
Unclear	?	When there is a misunderstanding in a response.
Too Vague	TV	When the candidate has attempted something, but the mark/skill has not been awarded.
Highlight	Highlighter Or Underline	To highlight a point or section of an answer that justifies the mark/annotation.
Benefit of doubt	BOD	When the candidate has attempted something, and the mark/skill has been awarded.
On page comment	On page comment	Rarely used in live marking. Very useful for practice scripts. To communicate with the supervisor.
Not using text	NUT	When the context has not been used.
Seen	SEEN	To show a page/section has been seen/read.
Not answering question	NAQ	When the response is not focussed on answering the question.
Repetition	REP	The repetition of a previous point in a response Or Candidate is copying the case study/data.

<b><u>To award</u></b>	<b><u>Proposed annotation</u></b>	<b><u>Comment</u></b>
Own figure rule	<b>OFR</b>	The own figure rule applies – acts as a mark/tick.
Knowledge (AO1) L1	<b>K</b>	When AO1 has been awarded. Number of Ks should match the mark awarded.
Knowledge (AO1) L2		
Application (AO2) L1	<b>APP</b>	When AO2 has been awarded. Number of APPs should match the mark awarded.
Application (AO2) L2		
Analysis (AO3) L1	<b>AN</b>	When AO3 at Level 1 has been awarded.
Analysis (AO3) L2	<b>DEV</b>	When AO3 at Level 2 has been awarded.
Evaluation (AO4) L1	<b>EVAL</b>	When AO4 at Level 1 has been awarded.
Evaluation (AO4) L2	<b>E</b>	When AO4 at Level 2 has been awarded.
Evaluation (AO4) L3	<b>EE</b>	When AO4 at Level 3 has been awarded.

Question	Answer	Marks
1(d)	<p>Accept all valid responses.</p> <p>Bank Loans means a fixed amount of money from the bank but can have high interest rates <span style="border: 1px solid red; padding: 0 2px;">K</span> which would lead to increased costs/outflows <span style="border: 1px solid red; padding: 0 2px;">AN</span> and lower profits for the business <span style="border: 1px solid red; padding: 0 2px;">DEV</span> which means he will not be able to improve his cash flow issues as shown by the negative cash flow forecast. <span style="border: 1px solid red; padding: 0 2px;">APP</span></p> <p>Retained earnings <span style="border: 1px solid red; padding: 0 2px;">K</span> can also be another type of source of finance JC can get from its profits. Which means there are no cash outflows required such as when borrowing money. <span style="border: 1px solid red; padding: 0 2px;">AN</span> This is a method that JC already used for marketing and new equipment <span style="border: 1px solid red; padding: 0 2px;">APP</span> This will allow JC to have a better cash flow but he may not have enough capital to invest into the garage conversion straight away. <span style="border: 1px solid red; padding: 0 2px;">DEV</span></p> <p>A bank loan is the most appropriate method as a source of finance <span style="border: 1px solid red; padding: 0 2px;">EVAL</span> as JC requires \$15 000 so he can specifically ask for this amount from the bank to be able to reach its aim for growth. <span style="border: 1px solid red; padding: 0 2px;">EE</span></p> <p>However, this also depends on whether JC is able to take a loan from the bank or not <span style="border: 1px solid red; padding: 0 2px;">EVAL</span> and if so whether the interest rate is affordable <span style="border: 1px solid red; padding: 0 2px;">E</span> because if it is not affordable then the cost will increase drastically which will further affect the poor cash flow forecast negatively <span style="border: 1px solid red; padding: 0 2px;">EE</span></p>
