MATHEMATICS 9709/32

Paper 3 Pure Mathematics 3

February/March 2021

1 hour 50 minutes

You must answer on the question paper.

You will need: List of formulae (MF19)

INSTRUCTIONS

- Answer all questions.
- Use a black or dark blue pen. You may use an HB pencil for any diagrams or graphs.
- Write your name, centre number and candidate number in the boxes at the top of the page.
- Write your answer to each question in the space provided.
- Do not use an erasable pen or correction fluid.
- Do not write on any bar codes.
- If additional space is needed, you should use the lined page at the end of this booklet; the question number or numbers must be clearly shown.
- You should use a calculator where appropriate.
- You must show all necessary working clearly; no marks will be given for unsupported answers from a calculator.
- Give non-exact numerical answers correct to 3 significant figures, or 1 decimal place for angles in degrees, unless a different level of accuracy is specified in the question.

INFORMATION

- The total mark for this paper is 75.
- The number of marks for each question or part question is shown in brackets [].

| 4 | The variables | x and | y satisfy | the | differential | equation |
|---|---------------|-------|-----------|-----|--------------|----------|
|---|---------------|-------|-----------|-----|--------------|----------|

$$(1 - \cos x)\frac{\mathrm{d}y}{\mathrm{d}x} = y\sin x.$$

It is given that y = 4 when $x = \pi$.

| So | olve the differential equation, obtaining an expression for y in terms of x . |
