Paper 2 Research Methods

May/June 2020

1 hour 30 minutes

You must answer on the question paper.

You will need: Ruler

INSTRUCTIONS

- Answer all questions.
- Use a black or dark blue pen. You may use an HB pencil for any diagrams or graphs.
- Write your name, centre number and candidate number in the boxes at the top of the page.
- Write your answer to each question in the space provided.
- Do **not** use an erasable pen or correction fluid.
- Do not write on any bar codes.

INFORMATION

- The total mark for this paper is 60.
- The number of marks for each question or part question is shown in brackets [].

Section A

Answer all questions in this section.

1	In th	ne study by Baron-Cohen et al., one variable was the score on the Eyes Test.
	(a)	State whether this was an independent variable or a dependent variable. Include a reason for your answer.
		[1]
	(b)	One problem with the original version of the Eyes Test was that the results produced a 'ceiling effect'. This is where most participants obtain high scores on the test.
		Explain why a ceiling effect is a problem.
		[1]
2		sychologist is investigating whether a person's happiness depends on whether people around mare happy.
	(a)	Suggest how you could operationalise 'happiness' when using observations.
		[1]
	(b)	Suggest how you could measure 'happiness' when using a self-report.
		[1]
	(c)	Write a directional (one-tailed) hypothesis for this investigation. You do not have to operationalise your hypothesis.
		[1]

3

3	stuc	e part of the investigation by Dement and Kleitman (sleep and dreams) involved a correlational by measuring a range of times spent in REM sleep and the number of words in the participant's am narrative.
	(a)	Explain why this part of the investigation was a correlational study rather than an experiment.
		[1]
	(b)	Explain one disadvantage of using a correlation in this study.
		[2]
4	a co	study about helping, participants were told the study was about visual tracking. They played omputer game in which they could help other players. They were given fake eye-movement king spectacles to wear.
	(a)	Describe the ethical issue of deception, using this study as an example.
		[2]
	(b)	Some participants were upset at debriefing because they had not helped other players.
		Describe the ethical guideline of protection, using this study as an example.
		[2]

5

Before the study by Pepperberg (parrot learning), most research on animal learning had been

con	ducted on primates, such as chimpanzees.
(a)	Explain one ethical reason why a parrot is a better choice of animal than a chimpanzee for a study in a laboratory.
	[2
(b)	Explain one practical or methodological reason why the parrot was a better choice of anima than a chimpanzee for this study.
	כז

6	Describe what is meant by 'experimental conditions' and 'control conditions' in research, using any examples.
	91

Section B

Answer all questions in this section.

7			conduc s are:	cting a self-report study into obedience using school children as participants. Her
	Que	stion	1	How many times this week have you disobeyed a teacher? Never / once / 2–3 times / 4 times or more
	Que	stion	2	Describe why you last disobeyed a teacher.
	(a)	(i)	State v	which question collects quantitative data. Include a reason for your answer.
				[1]
	((ii)		why this type of data is useful.
				[1]
		quai	ntitative	ne other question which could be used in Maria's study that would collect data.
				[1]
			-	most appropriate measure of central tendency for Maria to use with the responses question. Include a reason for your answer.

8

3	bac the	kgro re ar	is conducting an experiment to investigate whether daydreams are affected by the type of und noise. He has two groups who are both given a boring task in a room. For one group e children laughing outside the open window. For the other group there are adults talking the corridor. Different participants are used in each group.
	(a)	(i)	Identify Richard's experimental design. Include a reason for your answer.
			[2]
		(ii)	Suggest one advantage of this experimental design in this study.
			[2]
	(b)	Sug	gest one reason for using a boring task in this study.
	(-)	·····	
	(c)	Sug	gest one practical or methodological problem with studying daydreams.
			[2]
	(d)	Sug	gest one ethical problem with studying daydreams.
			[2]

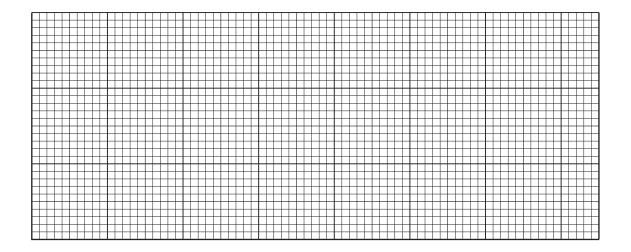

9 Jasper conducted an observational study of children's behaviours in their school common room. Jasper's data is shown in Table 9.1.

Table 9.1

		Behaviour	s observed	
	Sitting alone	Drinking tea	Dancing	Verbal aggression
Number of instances	10	15	5	1

(a) Draw a bar chart of Jasper's results.

[4]

(b)	Jasper observed the children with the permission of the school principal and the children's parents.					
	(i)	Explain why it was necessary to obtain permission in this study.				
	(ii)	Explain whether there could have been an issue with privacy in this study.				
(c)	Jas	per was a non-participant observer.	[-]			
	Ехр	lain what is meant by a 'non-participant observer', using this study as an example.				
			[2]			

Section C

Answer all questions in this section.

of	son is a university lecturer and is interested in doodling behaviour. One day, Jason sees one his students, Karen, doodling. Jason is especially interested because Karen has a visua pairment that means she cannot see. Jason decides to conduct a case study on her.
(a)	Describe how Jason could conduct a case study on Karen to investigate her doodling behaviour.

	[10]
(b)	Identify one practical weakness/limitation with the procedure you have described in your answer to part (a) and suggest how your study might be done differently to overcome the problem.
	Do not refer to ethics or sampling in your answer.
	TAT
