Paper 2 Research Methods

May/June 2020

1 hour 30 minutes

You must answer on the question paper.

No additional materials are needed.

INSTRUCTIONS

- Answer all questions.
- Use a black or dark blue pen. You may use an HB pencil for any diagrams or graphs.
- Write your name, centre number and candidate number in the boxes at the top of the page.
- Write your answer to each question in the space provided.
- Do **not** use an erasable pen or correction fluid.
- Do not write on any bar codes.

INFORMATION

- The total mark for this paper is 60.
- The number of marks for each question or part question is shown in brackets [].

This document has 12 pages. Blank pages are indicated.

Section A

Answer all questions in this section.

1	(a)	State what is meant by the ethical guideline of 'replacement' in relation to animals.
	(b)	Suggest one practical problem with following the ethical guideline of replacement in relation to animals.
		[1]
2	ther	ne study by Canli et al. (brain scans and emotions), participants watched scenes presented to m on a screen. They responded to these scenes by pressing buttons. Their response was one endent variable.
	(a)	Describe how this dependent variable was operationalised in this study.
		[2]
	(b)	Explain one reason why the results of this study may not generalise to everyday life.
		[2]

3	And	Irade conducted an experiment on doodling. Alternatively, she could have conducted a c dy.	case
	(a)	Identify two ways that data could be collected in this case study.	
		1	
		2	
			. [2]
	(b)	For one of your answers in 3(a) :	
		Explain one advantage of this way of collecting data in this case study.	
		Way of collecting data:	
		Advantage:	
			. [2]
4	(a)	Name two types of observations.	
		1	
		2	. [2]
	(b)	For one of your answers in 4(a) :	
		Explain why this type of observation is a valid way of observing participants.	
		Type of observation:	
		Explanation:	
			. [2]

5	At the start of the study by Bandura et al. (aggression), the children were scored numerically on their behaviour in the nursery school.
	Explain one advantage of scoring behavioural data in this way.
	[2]
6	Describe what is meant by 'participant variables' and 'situational variables' in research, using any examples.
	[6]

Section B

Answer all questions in this section.

7

7	perf com	rk is planning a natural experiment to investigate the short-term effect of noise on classroom formance of school children. He has found a school next to a noisy railway. He is going to appare the children before and during a temporary closure of the railway which will stop all trains two weeks.
	(a)	Explain what makes this study a natural experiment.
		[2]
	(b)	Suggest one way that Mark could measure the effect of noise on the children.
	(0)	Identify the extremely variables that Mark sould central
	(c)	Identify two extraneous variables that Mark could control. 1
		2
		[2]
	(d)	Write an operationalised directional (one-tailed) hypothesis for Mark's experiment.

Rac	chel i	s correlating two variables: helping behaviour and communication skills.	
(a)	(i)	Suggest one way that Rachel could measure helping behaviour for this study.	
			. [2]
	(ii)	For the way you have suggested in (a)(i):	
		Suggest one advantage and one disadvantage of this way of measuring helphaviour.	ping
		Advantage:	
		Disadvantage:	
			. [4]
(b)	Out	line the relationship that Rachel will find if her results indicate a positive correlation.	
			. [1]

9

		as collected data about intelligence. He has measured the IQ (Intelligence Quotient) of mple of participants.	f a
(a)	Des	scribe one way that Perry could obtain a large sample of participants.	
			[2]
(b)	(i)	When Perry plots the IQ results, they show a normal distribution.	
		Draw a graph of the likely results of the IQ scores using the axes below. You must label the axes of your graph.	[3]
	(ii)	Name the most appropriate measure of central tendency for Perry to use with to IQ data. Include a reason for your answer.	he
			[2]
	(iii)	Label your graph to show the position of the measure of central tendency that you ha named in (b)(ii) .	ve [1]

Section C

Answer all questions in this section.

10	Cec	cil is studying a family. The mother, father and both of their sons all have a phobia of trees.
	(a)	Describe how Cecil could conduct unstructured interviews to investigate the phobia in this family.

	[10]
(b)	Identify one practical weakness/limitation with the procedure you have described in your answer to part (a) and suggest how your study might be done differently to overcome the problem.
	Do not refer to ethics or sampling in your answer.
	[4]
